

YE-530 四柱式精密裁断机 Four Precise Type Column Hydraulic Cutting Machine

1. 双油缸，精密四柱自动平衡连杆结构，保证每一个裁断位置裁断深度完全相同。
2. 有特长冲程设定，适应特厚的材料及特高的刀模冲裁。
3. 裁断下压接触裁刀时自动慢切，使裁断料最上层与最下层没有尺寸误差。
4. 特有设定构造，配合裁断刀及裁断深度，使冲程调整简单，准确。
5. 中央自动润滑系统确保机器精密度及提高机器耐用度。

1. Two oil cylinders, 4 precise column automatic balances the suture of connecting rod, each cutting location depth complete identical.
2. It has very long stroke design for very thick material and very high cutter.
3. Cutting head get slowly when touching cutter, almost no difference between the first and the highest level of material.
4. The fixed structure, cutter and cutting depth make the stroke adjustment simple and precise.
5. Central automatic lubrication system ensures the machine precision and increases its durability.

机械尺寸 Dimensions	重量 Weight	电压 Voltage	功率 Power	最大裁断力 Max Cutting Power	产量 Capacity
1330X2330X1760mm	1500Kg	380V	4kw	30T	25000 双/8 小时
